

Routes to Community Control and Accountability

Date: 21 March 2017

Time: 10:00am – 3:00pm

Location: RBS, 250 Bishopsgate, London, EC2M 4AA

Overview

An interactive event exploring which routes are most effective and useful for securing control over what happens in your area, and how to ensure you are genuinely involving your community in decisions and action locally!

We will be showcasing four contrasting approaches – Community Organising, neighbourhood planning, community councils and community investment, exploring their strengths and challenges and how to make them work best for your area, with signposting to the best resources to help make the most of these opportunities.

There will be plenty of opportunity to share your ideas about how to improve community control and accountability in your neighbourhood.
